Requirement: Instruct Copilot to build Restful API for CRUD services for list of book which has 10 items as book (id, name, page, price). Then testing APIs by POST MAN following URLs pattern in table

/books

GET	/books	Lists all the books in the database
DELETE	/books/{bookId}	Deletes a book based on their id
POST	/books	Creates a Book
PUT	/books/{bookId}	Method to update a book
GET	/books/{bookId}	Retrieves a book based on their id
